Environmental Chemistry: A global perspective Gary W. vanLoon, Stephen J. Duffy

Chemical processes shape the world we live in; the air we breathe, the water we drink, the weather we experience. Environmental Chemistry: a global perspective describes those chemical principles which underpin the natural processes occurring within and between the air, water, and soil, and explores how human activities impact on these processes, giving rise to environmental issues of global concern. Guiding us through the chemical composition of the three key environmental systems - the atmosphere, hydrosphere, and terrestrial environment - the authors explain the chemical processes which occur within and between each system. Focusing on general principles, we are introduced to the essential chemical concepts which allow better understanding of air, water, and soil and how they behave; careful explanations ensure that clarity is not sacrificed at the expense of thorough coverage of the underlying chemistry. We then see how human activity continues to affect the chemical behaviour of these environmental systems, and what the consequences of these natural processes being disturbed can be. Environmental Chemistry: a global perspective takes chemistry out of the laboratory, and shows us its importance in the world around us. With illuminating examples from around the globe, its rich pedagogy, and broad, carefully structured coverage, this book is the perfect resource for any environmental chemistry student wishing to develop a thorough understanding of their subject. -In-depth and rigorous discussion of the chemical principles of the most important environmental issues, illustrated throughout with ample example problems -Clarity of the text is not sacrificed to achieve depth of coverage -Frequent worked examples build students' confidence in the material being presented Online Resource Centre For students:

From reader reviews:

Frances Norman:

The particular book Environmental Chemistry: A global perspective has a lot of knowledge on it. So when you check out this book you can get a lot of benefit. The book was written by the very famous author. The author makes some research previous to write this book. That book very easy to read you can get the point easily after scanning this book.

Kathy Natal:

Environmental Chemistry: A global perspective can be one of your beginner books that are good idea. All of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort that will put every word into enjoyment arrangement in writing Environmental Chemistry: A global perspective although doesn't forget the main position, giving the reader the hottest and also based confirm resource information that maybe you can be considered one of it. This great information can certainly drawn you into completely new stage of crucial pondering.

Connie Cornish:

In this period globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The actual book that recommended for you is Environmental Chemistry: A global perspective this guide consist a lot of the information of the condition of this world now. This particular book was represented how can the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. Often the writer made some investigation when he makes this book. Honestly, that is why this book acceptable all of you.

Arthur Lee:

Many people said that they feel uninterested when they reading a book. They are directly felt that when they get a half portions of the book. You can choose typically the book Environmental Chemistry: A global perspective to make your personal reading is interesting. Your skill of reading skill is developing when you such as reading. Try to choose simple book to make you enjoy you just read it and mingle the idea about book and looking at especially. It is to be very first opinion for you to like to start a book and read it. Beside that the e-book Environmental Chemistry: A global perspective can to be your brand-new friend when you're feel alone and confuse in what must you're doing of their time.
