Paul Monk, Lindsey J. Munro

**Maths for Chemistry: A chemist's toolkit of calculations** Paul Monk, Lindsey J. Munro

Mathematical skills and concepts lie at the heart of chemistry; however, they are also often the aspects of the subject that students fear the most. Now in a new edition, *Maths for Chemistry* addresses the challenges faced by many students in acquiring the math skills necessary to gain a full understanding of chemistry. Working from basic yet essential principles, this unique text builds students' confidence by leading them through the subject in a steady, progressive way, moving from basic algebra all the way to quantum mathematics. Employing a modular structure, authors Paul Monk and Lindsey J. Munro present the material in short, manageable sections in order to keep the content as accessible as possible.

Opening with an introduction to the "language" of math and the fundamental rules of algebra, *Maths for Chemistry* goes on to cover powers, indices, logs and exponential functions, graphical functions, and trigonometry before leading students through both differentiation and integration and on to quantum mathematics. It is the first book of its kind to use chemical examples throughout in order to demonstrate the relevance of mathematical concepts to the study of chemistry. The volume is enhanced by definitions of all key terms, self-check questions, and extensive end-of-chapter problems. A Companion Website features additional resources for both students and instructors.

### **From reader reviews:**

#### **Melanie Archer:**

What do you concerning book? It is not important along with you? Or just adding material when you need something to explain what yours problem? How about your spare time? Or are you busy man? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. They should answer that question mainly because just their can do in which. It said that about book. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need this kind of Maths for Chemistry: A chemist's toolkit of calculations to read.

#### **Jennifer Pittman:**

A lot of people always spent their own free time to vacation or even go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity this is look different you can read the book. It is really fun for yourself. If you enjoy the book that you read you can spent the entire day to reading a e-book. The book Maths for Chemistry: A chemist's toolkit of calculations it is rather good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. When you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore simply to read this book out of your smart phone. The price is not too expensive but this book offers high quality.

#### **Earnest Koontz:**

In this period globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you is Maths for Chemistry: A chemist's toolkit of calculations this publication consist a lot of the information from the condition of this world now. That book was represented just how can the world has grown up. The language styles that writer make usage of to explain it is easy to understand. Typically the writer made some research when he makes this book. Here is why this book suitable all of you.

#### **Lula Day:**

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is written or printed or outlined from each source that filled update of news. In this particular modern era like right now, many ways to get information are available for you. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your

book? Or just in search of the Maths for Chemistry: A chemist's toolkit of calculations when you needed it?
