The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations Peter L. King, Jennifer S. King

The Product Wheel (PW) design process has practical methods for finding the optimum sequence, minimizing changeover costs, and freeing up useful capacity. So much so, that the DuPont™ Company and Exxon Mobil are just a few companies that have used the product wheel concept to achieve and sustain a competitive advantage.

Breaking down a fairly complex design process into manageable steps, **The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations** walks readers through the process for designing and implementing the PW technique. It includes a case study taken from actual practice that illustrates the design process and its benefits. Describing how to apply the product wheel technique to any manufacturing operation, the book:

- Details the steps required to implement product wheels
- Explains why certain traditional manufacturing metrics should be reevaluated so they don't inhibit product wheel performance
- Defines the cultural foundation necessary for smooth product wheel design and implementation
- Includes a real-world case study and several examples of product wheels being used by successful manufacturing companies?including BG Products, Inc., the DuPont™ Company, the Dow Chemical Company, and Appleton

Many of the steps in wheel design described in this book are not new. What's new is their application to production planning and scheduling problems, and more importantly, a clear roadmap explaining how and when they should be used in product wheel design.

Supplying you with the tools to reduce the chaos often found in production scheduling, the book outlines a disciplined structure that will allow you to spend less of your time resolving schedule problems. Most importantly, it provides your organization with a stable platform to deal with abnormal events in a less stressful and more logical manner.

From reader reviews:

Stephen Stover:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a wander, shopping, or went to the particular Mall. How about open or maybe read a book allowed The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations? Maybe it is to get best activity for you. You know beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have some other opinion?

Bob Bartlett:

Nowadays reading books be a little more than want or need but also become a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want get more knowledge just go with education and learning books but if you want really feel happy read one together with theme for entertaining like comic or novel. The particular The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations is kind of book which is giving the reader erratic experience.

Tracy Caudle:

Hey guys, do you wants to finds a new book to study? May be the book with the title The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations suitable to you? Often the book was written by renowned writer in this era. Typically the book untitled The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations is the main of several books that will everyone read now. This kind of book was inspired lots of people in the world. When you read this reserve you will enter the new dimension that you ever know before. The author explained their plan in the simple way, consequently all of people can easily to understand the core of this guide. This book will give you a great deal of information about this world now. To help you see the represented of the world on this book.

Dona Henry:

Is it you who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something totally new? This The Product Wheel Handbook: Creating Balanced Flow in High-Mix Process Operations can be the respond to, oh how comes? A fresh book you know. You are thus out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these publications have than the others?
